

BIR MEHTO

Flutter Developer | Mobile Engineer (Android · iOS · Tablet · Android TV)

birmehto@gmail.com | +91 75289 40605 | Ahmedabad, India | birmehto.netlify.app | github.com/birmehto

PROFESSIONAL SUMMARY

Flutter Developer with 2.7+ years of experience building and maintaining production mobile applications across Android, iOS, tablets, and Android TV. Experienced in scalable Flutter architecture, state management, Firebase services, API integrations, and app-store deployment. Delivered 10+ production applications and contributed reusable engineering foundations that accelerated feature delivery across multiple client projects.

TECHNICAL SKILLS

Languages & Frameworks: Flutter · Dart · Kotlin (Android)

State Management: BLoC · GetX · Provider · Riverpod

Architecture & Patterns: Clean Architecture · MVVM · Repository Pattern · Dependency Injection · Software Design Patterns

Backend & Cloud: Firebase (Auth, Firestore, FCM, Storage) · REST APIs · Dart Frog

Performance & Quality: Flutter DevTools · Widget Tree Optimization · Lazy Loading · Isolates · Mobile Performance Optimization

Testing: Unit Testing · Widget Testing · Flutter Test

DevOps & Tools: Git · GitHub Actions · CI/CD · Fastlane (familiar) · Android Studio · VS Code · Figma · Postman

Deployment: Google Play · Apple App Store · Amazon Appstore · Samsung TV Store

WORK EXPERIENCE

Flutter Developer · IPOP Solutions LLP 2024 – Present | Ahmedabad

- Architected and shipped 10+ Flutter applications across Android, iOS, tablets, and Android TV, reducing development effort through reusable components and shared architecture patterns.
- Cut project delivery costs by 40% by designing reusable widget libraries, shared state-management patterns, and modular Clean Architecture adopted across all product teams.
- Reduced bug-fix turnaround time by standardizing BLoC and GetX state management across multiple apps, improving code testability and team velocity.
- Owned end-to-end CI/CD and release management across Google Play, Apple App Store, Amazon Appstore, and Samsung TV Store, including signing, certificates, and ASO-driven store listings.
- Delivered real-time features, push notifications, and secure authentication for 10+ apps by integrating REST APIs and Firebase (Auth, Firestore, FCM).

Junior Flutter Developer · Aark Infosoft Pvt. Ltd. 2023 – 2024 | Ahmedabad

- Built and delivered cross-platform Flutter features across 3+ client projects on schedule with minimal supervision, strengthening client retention.
- Reduced UI rendering bottlenecks by profiling widget rebuilds with Flutter DevTools, improving frame stability and reducing animation jank on low-end devices.
- Integrated REST APIs and implemented Provider-based state management while writing clean, well-documented Dart code reviewed by senior engineers.

PROJECTS

Oswal Solar Pumps | Flutter · Firebase · REST API · Android

- Built a utility app for the PM-KUSUM government solar pump program that reached 10,000+ Google Play downloads by implementing an offline-tolerant architecture with reliable background sync.

Lotus Digital Media — TV Signage App | Flutter · Android TV · Real-time Content Management

- Built an Android TV signage platform enabling businesses to manage and schedule advertising content remotely, eliminating manual content updates across deployed displays.

Flemini — AI Multi-Bot Platform | *Flutter · LLM APIs · GetX · Clean Architecture*

- Designed a multi-bot AI platform (developer assistant, astrologer, and more) by integrating LLM APIs with role-based prompt engineering, delivering domain-specific responses per persona under a single Clean Architecture codebase.

DropX — Open Source Flutter Package | *Flutter · Dart · pub.dev · Multi-Platform*

- Published a reusable, themeable dropdown widget package on pub.dev supporting mobile, web, and desktop, following Clean Architecture for consistent cross-platform behavior.

EDUCATION

Bachelor of Computer Applications (BCA) — Guru Nanak Dev University (2020 – 2023)
